

## CONTENTS Volume 69 1996

### Volume 69 No. 1

#### Special Issue: Anaerobic Processes for Bioenergy and Environment

Guest Editor: Birgitte K. Ahring

*The first part of this Special Issue was published in Volume 68, No. 4 (1995)*

<b>Limitations of thermophilic anaerobic wastewater treatment and the consequences for process design</b> J.B. van Lier	1-14
<b>Simulation of constituent processes of anaerobic degradation of organic matter by the METHANE model</b> V.A. Vavilin, V.B. Vasiliev, S.V. Rytov	15-23
<b>Inactivation of virus during anaerobic digestion of manure in laboratory scale biogas reactors</b> B. Lund, V.F. Jensen, P. Have, B. Ahring	25-31
<b>Combined removal of nitrate and carbon in granular sludge: Substrate competition and activities</b> H.V. Hendriksen, B.K. Ahring	33-39
<b>The influence of anaerobic pretreatment on the nitrogen removal from biosynthetic pharmaceutical wastewaters</b> P. Jeníček, J. Zábranská, M. Dohányos	41-46
<b>Post-treatments of anaerobic effluents</b> A. Tilche, G. Bortone, G. Garuti, F. Malaspina	47-59
<b>Introduction of a <i>de novo</i> bioremediation activity into anaerobic granular sludge using the dechlorinating bacterium DCB-2</b> N. Christiansen, B.K. Ahring	61-66
<b>Anaerobic degradation of xenobiotics by organisms from municipal solid waste under landfilling conditions</b> J. Ejertsson, E. Johansson, A. Karlsson, U. Meyerson, B.H. Svensson	67-74
<b>Methanogenesis at low temperatures by microflora of tundra wetland soil</b> O.R. Kotsyurbenko, A.N. Nozhevnikova, T.I. Solovieva, G.A. Zavarzin	75-86

## Volume 69 No. 2

**Special Issue: Lantibiotics: A Unique Group of Antibiotic Peptides.  
From 3D Structure to their Mode of Action and Application**

**Guest Editors: Ruud N.H. Konings and Cees W. Hilbers**

<b>Guest Editorial</b>	<b>87</b>
<b>Novel lantibiotics and their pre-peptides</b>	<b>89-97</b>
I.F. Nes, J.R. Tagg	
<b>Structures of lantibiotics studied by nmr</b>	<b>99-107</b>
F.J.M. van de Ven, G. Jung	
<b>Genetics of subtilin and nisin biosyntheses</b>	<b>109-117</b>
K.-D. Entian, W.M. de Vos	
<b>The biosynthesis of the lantibiotics epidermin, gallidermin, Pep5 and epilancin K7</b>	<b>119-127</b>
G. Bierbaum, F. Götz, A. Peschel, T. Kupke, M. van de Kamp, H.-G. Sahl	
<b><i>Enterococcus faecalis</i> cytolysin and lactocin S of <i>Lactobacillus sake</i></b>	<b>129-138</b>
M.S. Gilmore, M. Skaugen, I. Nes	
<b>Post-translational modifications of lantibiotics</b>	<b>139-150</b>
T. Kupke, F. Götz	
<b>Immunity to lantibiotics</b>	<b>151-159</b>
P.E.J. Saris, T. Immonen, M. Reis, H.-G. Sahl	
<b>Protein engineering of lantibiotics</b>	<b>161-169</b>
O.P. Kuipers, G. Bierbaum, G. Ottenwälder, H.M. Dodd, N. Horn, J. Metzger, T. Kupke, V. Gnau, R. Bongers, P. van den Bogaard, H. Kusters, H.S. Rollema, W.M. de Vos, R.J. Siezen, G. Jung, F. Götz, H.-G. Sahl, M.J. Gasson	
<b>Comparison of lantibiotic gene clusters and encoded proteins</b>	<b>171-184</b>
R.J. Siezen, O.P. Kuipers, W.M. de Vos	
<b>Mechanism of lantibiotic-induced pore-formation</b>	<b>185-191</b>
G.N. Moll, G.C.K. Roberts, W.N. Konings, A.J.M. Driessen	
<b>Applications of the bacteriocin, nisin</b>	<b>193-202</b>
J. Delves-Broughton, P. Blackburn, R.E. Evans, J. Hugenholtz	

## Volume 69 No. 3

<b><i>Trimmatostroma abietis</i> sp. nov (hyphomycetes) and related species</b>	<b>203-209</b>
H. Butin, L. Pehl, G.S. De Hoog, U. Wollenzien	
<b>A new type of growth exhibited by <i>Trimmatostroma abietis</i></b>	<b>211-215</b>
S. Yoshida, K. Takeo, G.S. De Hoog, K. Nishimura, M. Miyaji	
<b>Stationary phase development of <i>trimmatostroma abietis</i></b>	<b>217-222</b>
M.J. Figueras, G.S. De Hoog, K. Takeo, J. Guarro	

<b>Molecular differentiation of <i>Keratinomyces (Trichophyton)</i> species</b>	<b>223-227</b>
J. M. Guillamón, J. Cano, D. Ramón, J. Guarro	
<b>Some remarks on "a taxonomic key for the genus <i>Saccharomyces</i>" (Vaughan Martini and Martini 1993)</b>	<b>229-233</b>
J. Tornai-Lehocski, G. Péter, D. Dlačny, T. Deák	
<b>Purification and characterization of two different xylanases from the thermophilic actinomycete <i>Microtetraspora flexuosa</i> SII X</b>	<b>235-241</b>
S. Berens, H. Kaspari, J.-H. Klemme	
<b>Techniques for genetic engineering in mycobacteria</b>	<b>243-256</b>
J. Hermans, J.A.M. de Bont	
<b>Metabolic rates during sporulation of <i>Saccharomyces cerevisiae</i> on acetate</b>	<b>257-266</b>
J.C. Aon, S. Cortassa	
<b>Behaviour of the yeast <i>Kluyveromyces marxianus</i> var. <i>marxianus</i> during its autolysis</b>	<b>267-272</b>
A. Amrane, Y. Prigent	
<b>The flocculation of wine yeasts: biochemical and morphological characteristics in <i>Kloeckera apiculata</i></b>	<b>273-278</b>
G. Suzzi, P. Romano, F. Westall, L. Vannini	
<b>Ballistosporous yeasts found on the surface of plant materials collected in New Zealand</b>	<b>279-291</b>
M. Hamamoto, T. Nakase	

#### Volume 69 No. 4

##### Review

<b>Genome size in bacteria</b>	<b>293-303</b>
J.T. Trevors	

##### Research articles

<b><i>Nitrobacter winogradskyi</i> cytochrome <i>c</i> oxidase genes are organized in a repeated gene cluster</b>	<b>305-315</b>
G. Berben	
<b>Axenic mass cultivation of the free-living soil amoeba, <i>Acanthamoeba castellanii</i> in a laboratory fermentor</b>	<b>317-322</b>
P.H.H. Weekers, J.P.H. Wijen, B.P. Lomans, G.D. Vogels	
<b>Distinction of species in <i>Aureobasidium</i> and related genera by PCR-ribotyping</b>	<b>323-329</b>
N.A. Yurlova, J.M.J. Uijthof, G.S. de Hoog	
<b>Degradation of pyrimidine ribonucleosides by <i>Pseudomonas aeruginosa</i></b>	<b>331-335</b>
T.P. West	
<b>The genus <i>Malassezia</i> with description of four new species</b>	<b>337-355</b>
E. Guého, G. Midgley, J. Guillot	

**Location of the  $\beta$ -galactosidase of the yeast *Kluyveromyces marxianus* var. *marxianus* ATCC 10022** 357-361

M. Bacci Júnior, C.G. Siqueira, S.A. Antoniazzi, J. Ueta

**Influence of environmental factors on endo- $\beta$ -1,4-glucanase production by *Bacillus* HR68, isolated from Zimbabwean hot spring** 363-369

C. Mawadza, F.C. Boogerd, R. Zvauya, H.W. van Verseveld

*Short Communication*

**Interactions between *Eikenella corrodens* and "Streptococcus milleri-group" organisms: possible mechanisms of pathogenicity in mixed infections** 371-373

K.A. Young, R.P. Allaker, J.M. Hardie, R.A. Whiley
